

We work very closely with the school system in an effort to provide a top-notch education program. We collaborate with the school in literacy grant writing in an effort to push Early Childhood Literacy in the birth to five developmental stages. We also provide the afterschool program in all three elementary schools. We contribute more than \$2,000 per year toward educational programs within the school system, including the REACH scholarship. We also award more than \$20,000 a year in childcare tuition relief for parents that cannot afford it.

We employ over 54 Lumpkin residents and 40 of them have full-time hours. We work closely with LCHS and the WBL department to aid in training and employing teens entering the workforce. We contribute more than \$2,000 to the athletic department at LCHS. We sponsor and support a number of children in Park and Rec Youth Sports. We donate annually to many non-profit organizations within our community and volunteer our time when possible.
