

GetUWired has been operating since 2003 in Dahlonega, GA as an award-winning online marketing firm. From our humble beginnings as a three-person team, we have grown to an amazing team of nearly 50 locally sourced professionals providing online marketing and advanced development services to businesses around the globe!

We have taken a “Home Grown” approach to develop talent through mentorship and training programs that have successfully grown young aspiring team members into world-class artisans of their particular skill sets. Our pre-existing work-from-home program allowed us to transition to an effective remote work program throughout the Covid pandemic which allows for an optional social distancing workplace at our headquarters or completely remote options for our local employees.

GetUWired continues to also support our local community through involvement and philanthropy to our local organizations that serve Veterans and the Community at large.
