

Start with the Best, Build the Best!

Since 1999 Hawg Halters Inc. has been on a mission to challenge the status quo of a very dynamic and ever-changing V-Twin Custom Parts Marketplace in North America. In a market dominated at times by imported products, HHI created a supply line proudly designed and manufactured in their Dahlonega, Georgia facility. Built-in "Our House" is a source of great pride for all the staff at HHI.

The evolution of HHI has included the adoption of industry-leading technologies in Solids based computer-aided design and finite element analysis which allows us to perfect our product design execution. HHI carefully selects materials of the highest qualities including custom-made aircraft grade 6061 billet aluminum built to exacting HHI specifications, and the latest stainless steel alloys to deliver the best performing products in their categories.
