

Copeland Creative is a very unique business in the sense that we want to tell stories. Being a content creation and brand image/marketing firm, we are obsessed with a great story. We have been telling stories since the beginning of time and that is why everything we do is rooted in a story, it has to resonate with people.

Growing up in Dahlonega I have seen this area grow exponentially. It is an honor to be a company which gets to work hand in hand with our college and some of our local businesses to help them get their stories out to the region and in some cases the world.

We believe that communication, integrity and honesty are the backbone of our business.
